Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). *The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement.* For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which *describes our programs, including services and fees, you may contact your representative.*

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Advisory fees are calculated on the fair market value of the assets, as determined by SWS, on the last business day of the preceding calendar quarter. If the management of the account commences or is terminated at any time other than at the beginning or end of a calendar quarter, the fee is prorated based on the initial account value and the number of days the account was open in that quarter. For calculation purposes the fee is based on 365 actual days in a year (366 for leap year). The calculation is as follows: (Market Value x Rate x ((Days / 365)) with the Rate being the agreed upon fee within the Advisory Agreement. For more complete information on the fee charged, please contact your representative. If you would like a copy of the most recent form ADV or disclosure brochure document, which describes our programs, including services and fees, you may contact your representative.

Sale of bonds prior to maturity may result in a loss of principal. Mortgage backed positions are valued using the remaining balance and the current market price.

Non-Standard Assets: This statement shows all assets in your account including certain direct investments that may be held by a third party. TD AMERITRADE is not responsible for third party information, including the valuation of certain non-standard assets. The price shown represents an estimated value that is provided by an annual report or other source. The estimated value of these assets may not be realized when you try to liquidate the position. Assets held by a third party are not covered by the Securities Investor Protection Corporation (SIPC).

Auction Rate Securities ("ARS") Pricing: TD AMERITRADE has consistently reflected the value of ARS positions in client accounts and on account statements at par. Par value may not be the same as the market price that could be obtained in the event of a sale. The ARS market is currently experiencing a lack of liquidity and, as a result, there can be no assurance that such securities can be sold under current market conditions. In the event of a failed auction, the coupon rate paid to holders is typically set to a predetermined rate specified in the offering documents for such securities.

The most recent statement of financial condition for TD AMERITRADE Clearing, Inc. may be obtained at no cost, via the Internet at http://www.tdameritrade.com/financialstatement.html on or before June 12, 2009, or by contacting TD AMERITRADE Clearing, Inc. at 1-800-237-8692.
